

121 CHESS PROBLEMS

Awarded Third Prize in Brentano's
International Problem Tourney 1882

White to play and mate in four moves

121 CHESS PROBLEMS

J. W. Abbott

[1887]

An Electronic Edition
Anders Thulin, Malmö · 2005-01-24

PREFACE

A work like this requires little in the way of introduction. Individually its contents have already made their bow to the public, they are but gathered thus to renew old acquaintanceships, possibly, if the hope be not presumptuous, to make their circle of friends a little larger. The faces of a few, perhaps, wear the freshness that comes of forgetfulness, but all have undergone the ordeal of a first appearance elsewhere, and now present themselves in no other guise than that of “old stagers.” Criticism has long ago spent its force against them, and needs here to be neither deprecated nor defied.

Equally unnecessary are any remarks on the history or philosophy of Chess strategy. The “learned world” has probably at least as much regard for problems as paradoxes, and those anxious to provide it with knowledge thereon may reasonably expect for reward a gratitude too profound to be expressed. But that is not the object of this Collection. Its purpose will be fully attained if it interests any one who, caring nothing for the “why” or the “how,” delights in that particular form of enigma that is propounded in terms of Chess.

In the selection of the various positions, the Author has been largely guided by the popular judgment at the time of publication, and he has included all those which have received in Problem Tourneys the more emphatic recognition of a judge’s award. Without entering into particulars of time and place, the following have won prizes, either separately or as parts of successful sets, viz.:—Nos. 1, 15, 16, 21, 51, 52, 59, 60, 69, 89, 90, 92, 93, 100, 102, 104, 105.

163, NEW BOND STREET,
LONDON

NOTES TO ELECTRONIC EDITION

This edition is based on the original edition, published and printed in 1887 by Jas. Wade, 18 Tavistock Street, Covent Garden.

All problems have been tested for unsoundness, using the computer program *Problemist 2.20*. Found errors have been indicated in the stipulation: [†] indicates a problem without a solution in the stipulated number of moves, [*] a problem with multiple solutions, and [§] the existence of a short solution. In each case, further details are given in the solution.

In the printed copy used to prepare this new edition, the unsoundness of problem 110 was noted, along with a suggested correction in a marginal note. As it is not known if this is simply a correction of a misprint, the details have been given only in the solution.

In a few cases, known sources for the problems have been added.

Solutions have been converted to algebraic notation, using 'S' to indicate knights, following modern problem convention.
